

WIN YU YU MYAT

winyu2myat193@gmail.com | +66 657088438 | [LinkedIn](#) | [GitHub](#) | [Tableau Public](#) | [Portfolio](#)

SUMMARY

- Proficient in Python, SQL, Java, HTML/CSS, and advanced Excel for data analysis and manipulation.
 - Skilled in creating interactive dashboards and visualizations using Power BI and Tableau.
 - Experienced in data mining, machine learning, and predictive analytics to support business decisions.
 - Strong background in market research, requirement gathering, and both qualitative and quantitative analysis.
-

WORK EXPERIENCES

Junior Data Analyst Intern (iCONEXT CO.,LTD)

Jun 2025 - Nov 2025

- Developed predictive models for reject inference by performing end-to-end data preprocessing, feature engineering, and model training using Python, machine learning algorithms, and DAVinCI Labs, contributing to improved credit risk evaluation.
 - Designed and optimized interactive Tableau dashboards with drill-down capabilities, enabling stakeholders to monitor financial KPIs, uncover trends, and make data-driven decisions more effectively.
 - Conducted data validation and accuracy checks in SAS Enterprise Guide, ensuring integrity across large financial datasets and supporting reliable business insights.
-

PROJECTS

Real Estate Price Prediction Website ([Github](#))

Jan 2025

- Developed a machine learning-based web app to predict real estate prices using Python, Flask, and Scikit-Learn.
- Built a regression model with the Bangalore home prices dataset, applying feature engineering, outlier detection, dimensionality reduction, and hyperparameter tuning using GridSearchCV.
- Integrated the trained model into a Flask API and designed a user-friendly HTML/CSS/JavaScript interface for real-time predictions.

Employee Attrition Analysis Using Data Mining Approach ([Github](#))

Nov 2024 – Dec 2024

- Data Manipulation: Cleaned and pre-processed data from the IBM HR Analytics dataset, alongside additional company-sourced data, focusing on attributes like job satisfaction, work-life balance, and overtime hours.
 - Predictive Modeling: Utilized classification algorithms, including Decision Trees, to predict at-risk employees and identify patterns associated with attrition.
 - Insights and Outcomes: Gained 82.49% accuracy and provided insights to help HR improve retention strategies.
-

EDUCATION

Bachelor of Science in Information and Communication Technology

Jan 2023 - Present

Rangsit University International College

- GPA: 3.82/4.00
 - Concentrations: Data Analytics, Data Science, Data Warehouse, Data Mining, Machine Learning & AI
-

ACTIVITIES & LEADERSHIP

Student Management Team Leader — RIC Language Center

Jun 2023 – Apr 2025

- Supervise and mentor team members, manage and resolve student inquiries to improve operational efficiency.

Marketing Volunteer — IT&CM Asia & CTW Asia-Pacific

Sept 2024

- Engaged with attendees, supported marketing efforts, and managed event materials distribution.

Public Relations Officer — ASEAN Youth Advocates Network (Myanmar)

2021 – 2022

- Organized webinars, managed external relations, and coordinated marketing to enhance engagement.
-

CERTIFICATIONS

- SAP Analytics Cloud Training — ASEAN Data Science Explorers 2023 Enablement Session (ASEAN Foundation)
 - [Google Data Analytics Professional Certificate](#) (Coursera), [Learning Data Analytics](#) (LinkedIn Learning)
-

SKILLS

- **Programming & Database:** Python, SQL, Java, JavaScript, HTML/CSS, MongoDB, Microsoft SQL Server, MySQL, SAS Enterprise Guide
- **Data Analysis & Visualization:** Power BI, Tableau, SAP Analytics Cloud, MS Excel, AI Studio
- **Development Tools:** Visual Studio Code, Eclipse, Jupyter Notebook
- **Languages:** English (B2), Japanese (B1), Burmese (Native)
